

The Sun

When the sun comes out I see a big shield of light.

When the sun comes out the gliders are in full flight!

When the sun comes out it helps our crops to grow.

When the sun comes out the rivers sparkle as they flow.

When the sun comes out I feel calm.

When the sun comes out it can cause harm.

When the sun comes out you need to take care.

When the sun comes out put your hat and glasses. Beware!
