

## The only one, Sun!

The sun, the sun, the only one.  
What would we do without it?

It shines so bright in the sky.

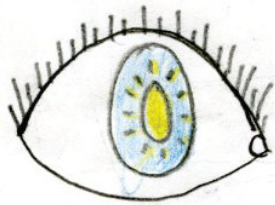

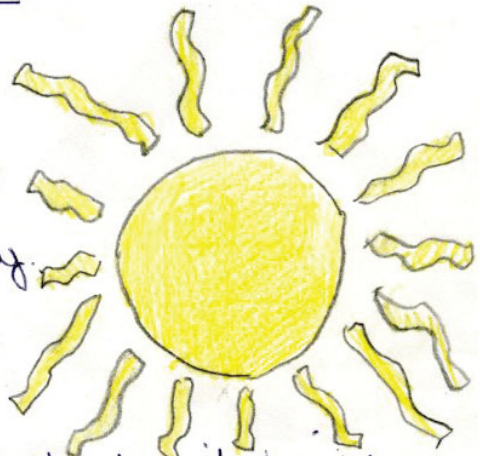

You hardly think about it.

But the sun helps us all  
In nearly every way.

And when it gets dark and cloudy, it brightens  
up your day!

In the night it has to go down and no light  
can be shown.

But in the end its the same sun and it wor-  
ks all its magic on its own.
